ENGINEERED FOR POWER.
BUILT TO LAST.

TESAB

DESIGNING ROBUST &
RELIABLE EQUIPMENT
FOR THE MINING,
RECYCLING &
QUARRYING
SECTORS.

ABOUT US

Tesab design, build and deliver robust aggregate crushing and screening equipment for the mining, quarrying and recycling industries at its head office in Omagh, N. Ireland.

Since 1992, Tesab's reputation for producing mobile and highly reliable equipment has grown and today their products are found around the globe contributing to the success of projects and customers across multiple applications. Tesab is passionate about providing innovative solutions and delivering unrivaled products and services to customers around the world. As a company that is involved in the handling and processing of the earth's resources, Tesab is committed to protecting the environment.

Tesab is part of Metso – a front runner in sustainable technologies, end to end solutions and services for the aggregates, minerals processing, metals refining and recycling industries globally.

WHY CHOOSE TESAB?

QUICK SUPPORT

Constantly reshaping to ensure continuous customer satisfaction.

ENGINEERING DESIGN EXPERTISE

30 years designing and delivering high performance equipment.

FIRST CLASS REPUTATION

Tesab have an enduring reputation for its products "being built to last". It has become the cornerstone of the brands identity.

OUR PEOPLE

We invest in the training and development of our people to ensure that we are equipped with the skills required to meet the needs of our customers and the sectors in which we operate.

ADDED VALUE

Our mission is to deliver unrivalled customer experience.

PARTS

We ensure that all equipment sold has critical spares held locally & additional volume held at our head office.

OUR SKILL

The best expertise and specialized capabilities in design and application.

AFTER SALES SERVICE

KEY BENEFITS

Technical help desks are available globally to help our dealers. Also, direct contacts to service engineers can be established and our experts can help either remotely or on site when needed.

Regular updates of replacement parts.

Technical training is conducted at the factory, at the dealer site or completely remote depending on the need.

Parts - we ensure that all equipment sold has critical spares held locally & additional volume held at our head office.

Our dealers all operate with full trained service and application and support teams.

TESAB

Tesab hold a large stock of genuine replacement parts in our manufacturing facility and have access to many more from our suppliers. With a dedicated and vastly experienced spare parts team, our aim is to always get you up and running as fast as possible.

WHY USE GENUINE PARTS?

- Prevent extensive damage to the machine
- Improve machine performance
- Protects the warranty & resale value of the machine
- Readily available parts ensure fast delivery & minimal downtime
- Warranty and dedicated aftersales support for peace of mind
- Manufactured with safety in mind

AT TESAB, SUSTAINABILITY ISN'T JUST A GOAL – **IT'S A RESPONSIBILITY**

As part of Metso, we're proud to lead the way in sustainable technologies that protect the planet while powering progress.

From our hybrid electric crushers to our efficient washing systems, every Tesab innovation is designed to reduce environmental impact.

We prioritize:

ENERGY EFFICIENCY:

Up to 33% more fuel-efficient hybrid electric crushers..

REDUCED EMISSIONS:

Electric drive systems and optimised diagnostics.

RESOURCE RECOVERY:

Advanced crushing, screening and washing systems that maximize material reuse.

CIRCULAR ECONOMY:

Supporting recycling operations that give materials a second life.

CONE CRUSHERS RANGE

The Tesab cone crusher is the ideal tracked secondary and tertiary crushing solution designed to produce high quality cubical aggregates at rates up to 250TPH.

It is designed for optimum versatility in crushing spreads with easy conversion from the finest to the coarsest cavity, adjustable speed to produce a higher percentage of on-spec product and fewer crushing stages – lowering cost and saving energy.

The Tesab cones have full-level features such as load and material level monitoring, full hydraulic closed side setting (CSS) adjust and a full hydraulic relief system as well as the option of a closed circuit recirculation setup.

ELECTRIC CRUSHERS

TESAB

HYBRID ELECTRIC JAW CRUSHERS

The Tesab's range of hybrid electric crushers is based on the proven Tesab jaw crusher range, the hybrid electric range is even more fuel efficient & cost effective while still producing the tonnages of its diesel equivalent.

Complete with efficient all electric drive & 3 year warranty on main electric components - the hybrid electric range is up to 33% more fuel efficient while saving up to 70% on running costs when working on mains electric.

The hybrid electric range comes packed with new features including auto unblock & reverse crusher operation, custom panel enclosure with integrated air conditioning & 10" display panel.

SCALPERS

TESAB

SCALPERS / RECLAIMERS

The Tesab Scalper range is specifically designed for the customer, as a more cost-effective machine to cater to those secondary or recycling screening applications.

The heavy duty screens offers superior productivity and its high quality components makes this one of the most dependable machines on the market. Perfect for contractors looking for flexible and highly portable mobile screening.

STACKERS

STACKERS RANGE

Tesab's stackers range are specially manufactured bulk handling solutions for the mining, shipping and quarrying sectors. With a unique range of products from bulk loaders to 'super-sized' tracked stockpilers, the Tesab stacker range provides a cost effective and practical solution to meet a wide range of customer demands.

WASHING

WASHING RANGE

Tesab provide a wide range of sand and aggregate washing, scrubbing, de-watering, classifying and separation equipment. The washing of sand and aggregates is required for many markets and applications providing producers the ability to remove excess water, reject deleterious material, and separate particles by size.

COARSE MATERIAL WASHER BUCKETWHEEL SANDSCREEN RINSER

WASHING RANGE

BUCKETWHEEL

Highly efficient Bucket Wheel range of Sand Classification System. Designed to operate with maximum versatility for efficient dewatering and fine sand recovery. The twin bucket units provide the removal of clays, silts and slimes to produce up to 2 grades of sand.
